## Thermo-Cured™ Feed Supplement

For all classes of beef cattle and dairy heifers, horses and other equines.

---

### Feeding Directions:

This Thermo-Cured™ Feed Supplement has been designed for “FREE CHOICE” usage in conjunction with good management practices. Consumption is controlled by a combination of factors including: composition of the supplement; hardness of the supplement; quality and quantity of roughage; weather conditions; previous feeding practices and management practices. Upon initial offering, place blocks at a ratio of one per block per 25 to 40 head and in an area where animals congregate, such as in loafing areas, near water source or where supplemental roughage is fed. Once animals have become accustomed to AFC 16% AN Thermo-Cured™ FEED SUPPLEMENT consumption can be managed:

- **To Promote Higher Levels of Consumption:** Increase number of blocks available. Relocate blocks closer to loafing, water, or feeding locations.
- **To Reduce Levels of Consumption:** Reverse above practices.
- **Observe the Following Precautions:** Provide unlimited drinking water. Provide adequate roughage in terms of both quantity and quality. Provide adequate mineral supplement free-choice in addition to AFC 16% AN Thermo-Cured™ FEED SUPPLEMENT. Monitor consumption closely and employ above management practices to control animal intake.

Adequate roughage must be available at all times. Intake of this Thermo-Cured™ Feed Supplement should average 0.75 to 2.0 lbs. per head per day based on a 1,000 pound animal.

Seller makes no warranty, expressed or implied, as to description, utility, productiveness or any other matter, except as to guaranteed analysis.

To open, remove top cardboard and protective sheet.

### Caution:

Do not feed to overly hungry or starved animals, as over consumption may occur.

This supplement should be used only in accordance with the directions on this tag. This product contains supplemental Selenium (Se). Intake of supplemental Selenium should not exceed 0.3 ppm on a dry basis.

### Warning:

Consult your dealer for products specifically designed for sheep/goats. This product contains supplemental copper and at normal consumption levels may contribute some 5 to 12 parts per million copper to the diet. Total diet copper for sheep/goats from all sources should never exceed 20 ppm.

### Ingredients:
