

## Pro Hunter Deer Tub

Blended Specifically for AFC Feed, LLC

Pro Hunter Deer Tub (this tub) feed supplement has been designed for “FREE CHOICE” feeding to growing and breeding deer in their natural environment as a supplement to their natural diet. Place this tub on the ground in known places where deer congregate, to feed, remove the cardboard cover and score the surface of the tub several times with a knife. Consumption of this tub will vary according to where the tub is placed, the supply of food, the season of the year and the animal’s need. Estimated consumption is 1 oz to 3 oz per head per day. Check tubs every week to 10 days and renew supply as needed.

Once animals have become accustomed to this tub consumption can be managed:

- To Promote Higher Levels Of Consumption: Increase number of blocks available. Relocate blocks closer to loafing, water, or feeding locations.
- To Reduce Levels Of Consumption: Reverse above practices.

### Warning:

Some states have laws that make it illegal to feed wild deer and/or to use feed products to bait

deer for hunting purposes. Please check with the appropriate state wildlife conservation authorities to verify feeding is legal.

This tub, which contains added copper, should not be fed to sheep or any species with a low tolerance to supplemental copper.

### Ingredients:

Processed Grain By-Products, CORN, Molasses Products, Lignin Sulfonate, Salt, Roasted Soybeans, Calcium Hydroxide, Monocalcium Phosphate, Calcium Carbonate, Calcium Propionate (a Preservative), Zinc Sulfate, Manganese Sulfate, Copper Sulfate, Sodium Selenite, Vegetable Oil, Zinc Amino Acid Complex, Manganese Amino Acid Complex, Copper Amino Acid Complex, Cobalt Glucoheptonate, Propionic Acid (a Preservative), Acetic Acid, Ammonium Hydroxide, Verxite, Sodium Bentonite, Calcium Bentonite, Vitamin A Supplement, Vitamin E Supplement, Vitamin D3 Supplement, Cobalt Carbonate, Ethylenediamine Dihydriodide
