

AFC Feed offers the most complete selection of deer feeds in the industry. Antler growth, health, immunity and reproduction are all factored in when creating our products. Our diets are formulated and evaluated by some of the best nutritionists in the country.

ACHIEVE MAXIMUM ANTLER GROWTH

Bucks need a diet rich in protein, especially during the antler growth period. A 16% protein diet is ideal for older bucks, while fawns require even higher levels (up to 20%) to support both body and antler growth. Poor nutrition has a negative effect on antler growth. Focus on providing a high-quality diet during the spring and summer months when antlers are actively growing. Ensure bucks are in good condition coming out of winter, as this will impact their ability to grow antlers in the following spring. Plant nutritious food plots that are high in protein and minerals. Fresh, clean water is crucial for overall health and to maximize feed intake. Maintain a healthy deer density and buck:doe ratio to reduce competition for resources.

MINERAL AND VITAMIN SUPPLEMENTATION

Ensure access to a complete vitamin and mineral supplement, particularly calcium and phosphorus, which are needed in an 2:1 ratio for absorption and essential for antler development.

MAXIMIZE GENETIC POTENTIAL

Allow bucks to reach their full genetic potential by allowing them to grow older, typically at least 3-4 years old. While nutrition and habitat play a crucial role, genetics also influence antler size and shape.

FEED RECOMMENDATIONS  
STAGE OF PRODUCTION

HIGH PERFORMANCE GROWTH  
(FEB - AUG)

- MaxRax Deer 16 and Deer Plus 17
- Antler Max Deer 20
- Big Buck Blend Rack Developer

GROWTH & MAINTENANCE  
(SEPT - JAN)

- Big Buck Blend 16 Point
- Antler Max Deer 20
- Pro Hunter

GESTATING DOE

- Big Buck Blend 16 Point
- MaxRax Deer 16
- Antler Advantage Breeder 16
- Antler Advantage Deer 20

LACTATING DOE

- MaxRax Fawn and Lactating Doe 20%
- Antler Advantage Deer 20
- Big Buck Blend 16 Point

DEER FEED

FEED PRODUCTS

BIG BUCK BLEND

Complete nutrition for growing and breeding deer. Correct mineral ratio for antler development. Persimmon flavored. \*Available with garlic or fenbendazole de-wormer.

- 16 Point – “Our most popular deer feed.”
- Rack Developer – 20% protein for antler growth

MAXRAX

Balanced and researched nutrition for growing and breeding deer. Fortified with chelated trace minerals, probiotics, digestive enzymes, biotin, rumen bypass protein and yeast culture. \*Available with fenbendazole de-wormer.

- Deer 16 – Complete nutrition for all growth stages
- Deer Plus 17 – Buck feed with extra protein, energy and minerals for maximum antler growth
- Fawn and Lactating Doe 20%

ANTLERMAX

Research-proven for growth and body condition. Climate Guard (CG) supports rumen function and gut health. Fortified with chelated trace minerals fermentation product and rumen bypass protein.

\*Available with fenbendazole de-wormer.

- Deer 20 CG Bio-LG – Research -roven results
- Watershield Deer 20 CG Bio-LG

ANTLER ADVANTAGE

A nutrition-packed, pelleted ration designed to support the nutrition of deer in their native habitat. The high protein content supports top performance to promote antler development in bucks and reproductive success in does.

- Deer 20 Garlic
- Breeder 16

PRO HUNTER

This premium deer feed gives you the edge with energy from corn, extra protein from roasted soybeans and double the attractant with apple scent and peanut meal.

- Feed/Attractant
- Protein Block
- Deer Tub
