

GROWER/DEVELOPER PROGRAM

Using trial data from CPC Livestock, we have implemented a program designed to maximize cattle performance and minimize your cost of production.

Calves up to 800 lbs.

Feed CPC Grower/Rumensin® free choice as a creep feed and preconditioning ration. The addition of STIMU-LYX® HE-12 tubs will increase feed efficiency and improve feed conversion.

**Bulls and Heifers 800 lbs.
or more**

Hand Feed CPC Developer/Rumensin® at a rate of 1 - 1.5% of body weight per day. The addition of STIMU-LYX® HE-12 tubs will increase feed efficiency and improve feed conversion.

BEEF FEED

Formax™

NUTRITION

Proper nutrition is key to optimum performance of your cattle herd. Without proper nutrition, cattle will not meet or exceed your expectations. Formax™ Beef Feeds use high-quality protein, energy, vitamins and minerals to meet the daily nutrient requirements of your cattle. These feeds are formulated to provide a safe, consistent and nutrient-dense supplement to maximize the performance of your animals.

STEAM FLAKED CORN

Some Formax™ Beef Feeds contain steam flaked corn. The steam flaked process consistently increases the proportion of starch digestion in the rumen. This increases the energy level of the feed over other forms of processing.

IONOPHORE

Ionophores (Bovatec®, Rumensin®) are feed additives used in cattle diets to improve feed efficiency, increase weight gain and decrease coccidiosis. They are compounds that alter rumen fermentation patterns. Always follow label directions.

Do not feed products containing ionophores to horses.
