Feeding Directions:

This feed should be fed at the rate of 3 pounds of feed per hundred pounds of body weight for 5 consecutive days. (Examples: 100-pound pig will receive 3 pounds of feed per day for 5 consecutive days) to provide 4 mg/lb. of body weight over a period of 5 days.

Limitations:

Feed as sole ration in complete feed for a period of from 3-12 days to provide a total intake of 9 mg/kg of bodyweight. No withdrawal time needed.

Caution:

Under conditions of continued exposure to parasites, retreatment may be needed after 4-6 weeks. Consult veterinarian for assistance in the

diagnosis, treatment, and control of parasitism. Do not feed sheep due to copper levels in this feed.

Always provide a source of fresh clean water, and free choice minerals. When making changes in an animal's diet, allow a 7 to 10-day transition period. Provide ample feeder space for livestock. Do not feed wet, moldy, or insect infested feed.
