

OUR STORY

Since 2008, Hillsboro Feed Company has created its rations around a very simple philosophy: “Place good products in an arrangement that best fits the needs for your animals.” We do not use fillers or substitutes in any of our formulas or rations. As the only Non-GMO Project Verified Plant in Alabama, we strive to provide a broad selection of quality feeds to the communities we serve in multiple states.

Non-GMO Project Verified means Hillsboro Feed Company has passed rigorous third-party audits proving it strictly avoids Genetically Modified Organisms (GMOs) in its Non-GMO livestock and poultry feed formulas.

**Trusted nutrition
for the animals
you care for.**
